

Hazards are present in all workplaces and the employers goal is to provide practical, achievable and affordable management that comply with legislative and social requirements.

Hazard Management

Whether the hazard involves access & falls, hazardous chemicals & substances, contaminates such as asbestos, hazardous situations, small plant & tools, plant, traffic or working conditions, we can assist you achieve your hazard management goals.

Service description -

Our Hazard Management service assists employers manage hazards by understanding the hazard, identifying and assessing risks arising, looking at and estimating cost of practical management options and making recommendations.

Service details - We liaise with you and interested parties, review and understand existing documentation, attend the hazard site and conduct a detailed inspection of the hazard and its circumstances to identify

potential safety hazards issues and associated requirements.

We assess risks associated with the hazard, undertake research as required, propose practical, achievable and affordable control measures to mitigate assessed risks, prepare and issue a Hazard Management Report to you and discuss as required.

How the service works - After engagement and getting your background information, we inspect the hazard site and gather further information by observation and discussion with local and effected persons. Whilst the final report is prepared at our offices, we spend as much time as needed at the hazard site or other relevant places. Management options are related to the work needs and the workplace situation. It is often the case that we have discussions

or presentations with employers and employees in either the pre or post report phases.

Fisher Jenkin Workplace Safety encourages and assists employers proactively manage workplace safety risks whilst achieving compliance with obligations and responsibilities that employers must embrace in today's business environment.

Please contact our head office or nearest franchise for personal, positive and professional attention to your workplace safety needs.
